Personality

SMS Without Borders (SWOB) projects a brave and community-focused personality, dedicated to fostering safe, secure, and inclusive communication.

The platform stands for connection and unity, creating a space where users feel empowered and supported. While serving as a reliable and practical tool for overcoming communication barriers, Our tools embody traits like self-expression, freedom, and resilience.

This unique and authentic personality conveys a strong sense of responsibility, transparency, and empathy – ensuring users trust us to protect their most sensitive conversations.

Tone of Voice

Our tone of voice balances seriousness and playfulness, shifting seamlessly between concise, straightforward messaging for practical use cases and a more creative, approachable style for community engagement.

Confident but Empathetic	Our tone conveys assurance and reliability while staying approachable and human. Trust is built by addressing user needs with clarity and understanding, avoiding overly technical or intimidating language.
Straightforward and Concise	When explaining tools or processes, we communicate with clarity and brevity – ensuring messages are easy to digest and accessible.
Reassuring and Supportive	Our tone fosters a sense of safety and inclusion, making users feel secure and valued by showing that communication can remain private and protected – even in challenging situations.
Friendly and Relatable	For community-facing content, we adopt a warm and personable tone that resonates with its diverse audience. Formal or overly corporate language is avoided in favor of a more conversational approach.
Serious Where Needed, Playful When Appropriate	Our tone varies based on context. For technical documentation or serious topics, a more formal tone is adopted.

Logo

Presented below is the primary logo for *DekuSMS.*

Two versions of this logo are illustrated. The first displays the logo in its standard colors, optimized for application on white or light backgrounds. The white version, as shown in the second image, is ideal for darker or colored backgrounds.

The availability of multiple logo versions ensures adaptability in various environments. It also allows for the logo's usage in black and white or on other background colors, based on these guidelines.

Light Theme - Default

Indigo-700 #001871 **Teal-400** #2ED3B7

Dark Theme

White #FFFFFF **Teal-300** #5FE9D0

Grayscale Logo

In instances where color application is not feasible, two alternative logo options are provided:
Black (#000000) and *White* (#FFFFFF)

In this case, there is no contrast distinction among the logo's elements. All components of the logo, including the wordmark, coalesce into a singular color, thus ensuring clarity and visual unity

Grayscale - Black

Black #000000

Grayscale - White

White #FFFFFF

Logo Safe Areas

Maintaining the visual integrity of the logo requires preserving a "safe area" around it, free from encroachment by other visual elements or text. This measure also prevents the logo from being positioned too near to the edges of a document.

The minimum safe area is defined by a square, the size of which is the width of the small message bubble inside the DekuSMS logo . This square must be placed on all four sides of the logo, as demonstrated in the illustration.

Compliance with this guideline ensures that the logo's visibility and impact are consistently preserved.

Icon

Brand Colors

DekuSMS' visual identity primarily uses ***Indigo-700*** and ***as*** *an accent color* ***Teal-400***. These colors play an important role in defining and representing the brand.

It's important to note that these colors are integrated within an established color system, which has been specifically extended for User Interface (UI) applications, as illustrated on the next page.

Primary

Indigo-700
#001871

Accent

Teal-400
#2ED3B7

UI Color System

To ensure both accessibility and brand flexibility, implementing a UI extended color system is highly recommended. When applying colors to text, it is strongly advised to follow the Web Content Accessibility Guidelines (WCAG) 2, Level AA or AAA, which recommend a contrast ratio of at least 4.5:1 or 7:1 respectively.

While adhering to these guidelines is ideal, it is important to recognize that accessibility is influenced by a variety of factors, including user context, environmental conditions, and device capabilities.
